31 # Events
32 <hr>
33 - During the May holidays, I spent my time very interestingly. I walked a lot with
34   the pool, read and did not sleep until the morning. I also did laboratory work on the
35   "Operating systems".
36
37 - I really wanted to go to my parents for the weekend, but unfortunately there were no
38   weekends. My last week was fun and interesting.

30
31 # History
32 - In 2002 Aaron Swartz created atx, "the true structured text format". Swartz and Gruber then worked
33   together to create the Markdown language in 2004, with the goal of enabling people "to write using an
34   easy-to-read and easy-to-write plain text format, optionally convert it to structurally valid XHTML.
35
36 # Standardization
37 - From 2012, a group of people, including Jeff Atwood and John MacFarlane, launched what Atwood
38   characterised as a standardisation effort. A community website now aims to "document various tools and
39   resources available to document authors and developers, as well as implementors of the
40   implementations".
41
42 - In September 2014, Gruber objected to the usage of "Markdown" in the name of this effort,
43   rebranded as CommonMark. CommonMark.org published several versions of a specification,
44   implementation, test suite, and " to announce a finalized 1.0 spec and test suite in
45   has since been released as major issues still remain unsolved. Nonetheless, the following
46   projects have adopted CommonMark: Discourse, GitHub, GitLab, Reddit, Qt, Stack Exchange,
47   , and Swift.
